Sn1per Consultants value proposition is the cost-effective implementation and management of our clients' IT infrastructure and Security, adding strategic insight into key business decisions. While highly skilled in Pen Testing, Vulnerability Assessments, System Auditing, server, desktop, and peripheral support, Sniper Consultants competitive advantage is the proactive provision of its various services. Many IT outsourcing partners provide reactive services, responding merely to calls logged with their helpdesk, whilst Sn1per Consultants proactively ensures servers are secure, updated and patched. Our proactive monitoring ensures that both servers and desktops are running optimally, reducing the potential for system downtime. All calls and incidents are managed through our "advance assistance" helpdesk

Central to the success of Sn1per Consultants is the skill level of our staff. Sn1per Consultants maintains a highly skilled staff complement proficient in the latest technologies, with a distinct focus on strong troubleshooting and interpersonal skills to achieve expedient problem resolution. All staff is encouraged to pursue ongoing technical studies as part of their career development path.

Sn1per Consultants main focus comes down to 6 key elements:

SUPPORT | **ADVISORY** | **MANAGEMENT** | **SECURITY** | **DESIGN** | **TRAINING** |

TRAINING

- **Penetration Test Bootcamp**
 - This training is a hand-on-practical penetration testing boot camp. It will prepare you for real-world penetration testing as well as for bigger exams like the Offensive Security Certified Professional exam. This boot camp duration is for a whole week and will walk out of the Bootcamp class with extreme knowledge of Penetration Testing.
- **Social Engineering Training**
 - This Training is design for staff and employees to get up to date with all the developments and new types of Phishing Attacks in the market today. 80% of a successful attack is made successful due to employees that do not recognize a Phishing attack.
